## Consent Form

For use of the Immediate Post-Concussion Assessment and Cognitive Testing (ImPACT)

I have read the attached information. I understand its contents. I have been given an opportunity to ask questions and all questions have been answered to my satisfaction. I agree to participate in the ImPACT Concussion Management Program.

Dear Parent/Guardian,

Your school along with Agnesian HealthCare is currently implementing an innovative program for our student-athletes. This program will assist physicians/athletic trainers in evaluating and treating head injuries (e.g., concussion). In order to better manage concussions sustained by our student-athletes, we have acquired a software tool called **ImpACT** (Immediate Post Concussion Assessment and Cognitive Testing). **ImpACT** is a computerized exam utilized in many professional, collegiate, and high school sports programs across the country to successfully diagnose and manage concussions. If an athlete is believed to have suffered a head injury during competition, **ImpACT** is used to help determine the severity of head injury and when the injury has fully healed.

The computerized exam is given to athletes before beginning contact sport practice or competition. This non-invasive test is set up in "video-game" type format and takes about 20-25 minutes to complete. It is simple, and actually many athletes enjoy the challenge of taking the test. Essentially, the **ImpACT** test is a preseason physical of the brain. It tracks information such as memory, reaction time, speed, and concentration. It, however, is not an IQ test.

If a concussion is suspected, the athlete will be referred on to a physician or clinician for evaluation. The physician or clinician may recommend that your child take the post-injury test. Both the preseason and post-injury test data is used to help evaluate the injury. The information gathered can also be shared with your family doctor. The test data will enable these health professionals to determine when return-to-play is appropriate and safe for the injured athlete. If an injury of this nature occurs to your child, you will be promptly contacted with all the details.

I wish to stress that the **ImpACT** testing procedures are non-invasive, and they pose no risks to your student-athlete. We are excited to implement this program given that it provides us the best available information for managing concussions and preventing potential brain damage that can occur with multiple concussions. Agnesian HealthCare and your schools administration, coaching, and athletic training staff are striving to keep your child's health and safety at the forefront of the student athletic experience. **Please return the backside of this letter with the appropriate signatures.**

Sincerely,

Zach Pitz PT, DPT, LAT
